## DOMETIC

Mobile living made easy.

Comfort, Style & Excellent Water Efficiency For commercial vessels, houseboats, and other toilet systems with direct discharge into a holding tank, we offer a versatile range of high-quality SeaLand gravity-discharge toilets.

Designed to install directly above a holding tank, 500 series toilets feature a patented flush mechanism that creates an airtight seal between head compartment and holding tank. The longated seat and deep bowl provide the most home-like comfort available in pedal-flush toilets.

SeaLand foot-pedal toilets provide the ultimate water-conserving flush by using as little as 0.5 liter per flush. China bowl and fresh water flush provide comfort and the appearance of domestic toilet at an affordable price.

No flushing pump required - No risk of blockage at this point.

The 511+ are low profile and the 510+ are standard height models.

Choice of heights. sizes 510+/511+ Series has a domestic size, deep bowl for the more spacious bathroom.

For people with special health needs, the 500+ series accepts seats designed for handicap use.

Gravity discharge toilets are bolted onto the holding tank. Foresee of subsequent removal we recommend they are installed using a Sealant Tank Mounting Flange which can be ordered with the toilet (Part No. 03089). The special "Hold Down T Studs" supplied with your Traveler fit the flange or can be used for fixing through the tank top.

### Technical Specifications
