

The magnetic-inductive Flow sensor M2000 is the optimal solution for all water and waste water applications.

Its long-term stability and reliability distinguish it and make for it thus for all water and waste water applications the first choice.

- International drinking water approvals
- Compliance wit OIML R-49, ISO 4064
- DVGW and ISO installation length
- IP 68
- Maintenance free

Magnetic flow sensor

Technical data:

Flow speed :	up to 12m/s
Power supply:	230V/50Hz
Weight:	15,0kg
Measuring indicator:	Standard
Remote indication:	Standard
Earth flange:	Option
